

Quiz Game in Python

This project is a lightweight, interactive quiz game built with Python. Designed to be both fun and educational, the game challenges players with a series of questions from various categories. Users can test their knowledge, learn new facts, and enjoy a competitive quiz experience directly from their terminal.

Features include:

- A diverse range of questions.
- A scoring system that tracks the user's correct answers.
- Feedback provided immediately after each question, enhancing the learning experience.
- Easy-to-navigate menus and a straightforward user interface.
- Customizable question sets, allowing users to add their own questions and categories.

Whether you're looking to test your trivia knowledge, learn something new, or simply have some fun, this simple quiz game offers an engaging way to do so. Dive in and see how many questions you can answer correctly!
